

# ARTEMIS

powerful natural remedies

## To our valued customer,

Winter has arrived down here in Dunedin! We have had a few heavy frosts already and snow seems imminent. We have been wrapping up warm and sipping on the delicious ARTEMIS syrups.

We have some exciting times ahead at ARTEMIS. After some thorough market research we have decided to re-brand. ARTEMIS is getting a facelift!

As a valued customer, we really value your feedback, so if you have time, can you please email [support@artemis.co.nz](mailto:support@artemis.co.nz) to request a short questionnaire containing re-branding questions which should take you around 5 minutes to complete.

As a big thank you for completing this, you will be put in the draw to win one of 5 ARTEMIS Winter Health Packs containing:

- ARTEMIS Chest Relief Elixir
- ARTEMIS ViroGone Elixir
- ARTEMIS Thyme Lemon Syrup
- ARTEMIS Immuno Boost Tea

This pack will set you and your family up for the winter months to prevent and beat common winter health complaints.

Questionnaires need to be back by the end of this week. Thank you in advance!

Wishing you good health & happiness,  
**Sandra Clair**, Managing Director  
 M.A., Post. Grad. Dip. Health Science.

## Voltaren vs Comfrey

Everybody knows the brand name Voltaren or Cataflam. These brand names are made up of a drug called Diclofenac which is a non-steroidal anti-inflammatory drug to reduce inflammation and pain. There is little doubt that these drugs work but they do come with some serious well-known side-effects if used on a regular basis.

A great natural alternative is the herb Comfrey which is the key ingredient in the ARTEMIS Arthro Ease products. Comfrey is an excellent natural first-aid remedy to promote overall healing of the joints, bones & connective tissue. More importantly, we have found some interesting studies comparing Comfrey to a diclofenac (eg Voltaren) gel which show that Comfrey (used at a therapeutic dose, as in the ARTEMIS Arthro products) performs as well if not BETTER than the Voltaren gel! 1

### The authors stated that:

“It is encouraging and impressive to realise that a natural product seems to be an effective & safe alternative to the standard topical treatment with diclofenac.”

Try these products today to help with stiff, swollen winter joints.
